CLIMATE CHANGE IS THE GREATEST CHALLENGE OF OUR TIME.

The first step in addressing any challenge is to honestly face it. That’s why we’re asking municipalities to require gasoline retailers to place climate change and air pollution information labels on gas pumps.

CLIMATE CHANGE INFORMATION LABELS ON GAS PUMPS.

#FaceTheChange

www.ourhorizon.org
WE FIND OURSELVES in an unprecedented moment in human history. Our burning of fossil fuels has changed the basic chemistry of our planet and we’re running out of time to act. Ban Ki-moon, the Secretary-General of the United Nations, has called climate change the greatest challenge of our generation.

The first step in addressing any problem is to honestly face it. We talk about climate change, tar sands and pipelines, but we never question the simple act of pumping gas. There is a complete disconnect. The warning labels draw attention to this unexamined act. They disrupt the status quo and stimulate demand for alternatives. Businesses and governments will respond. It is a simple yet powerful way to shake us out of our sense of complacency and help move communities in a more sustainable direction. With warning labels already on cigarette packages all over the world, this idea has been primed to go global.
